

BEST PRACTICES

2019-20

1. SUPPORTING POOR AND NEEDY STUDENTS:

The College supports students whose financial condition is weak and they are not in a position to pay their fees. College allows such students to pay their fees in installments. Such students can pay whatever amount they have in various installments. In some cases college also waives some portion of their fees and they are encouraged to continue their education. Such students also get full fees waiver if the situation demands.

Apart from this, needy students also get books and other such reading material from library. It is ensured that no student leave college because of financial problems. College also provide them bag at concession rate.

2. INNOVATIVE TEACHING LEARNING:

Faculties are encouraged for innovative teaching practices. They go beyond just chalk duster and only lecturing class. Students are involved with various task based learning like *POSTER PRESENTATIONS, CLASSROOM SEMINARS, POWERPOINT PRESENTATIONS, BOOK REVIEWS, ASSIGNMENTS, FIELD PROJECTS, ETC..*

It is important that students work themselves, research on a given topic and present their task among their peers. This also breaks monotony of the traditional classroom. Project based learning has their involvement and it makes learner centric classroom and overall outcome is really good. Students also enjoy such learning methods. The college displays their posters in the classrooms, lobby and library.
