About the practice questions

This bank of 96 practice questions is designed to help you to prepare for the EnglishScore mobile English Speaking test. The questions are written to the same standard as the questions you will see in the exam.

There are 3 types of question in the Speaking test:

Read Aloud

Listen and Repeat

Answer Questions

There are instructions at the start of each question type. Each question type includes questions for the four **CEFR** levels that EnglishScore covers: **A2, B1, B2, C1**.

The questions cover the Personal, Public and Professional domains, using authentic language and contexts.

The speaking test assesses:

Pronunciation - saying the words in a way that other people can understand

Fluency - speaking at an appropriate speed, without stopping or pausing a lot

Communication - answering the question completely, with examples and/or additional information

Note that EnglishScore is a mobile test, so the question format in the real test is different from what you see in this bank, e.g. in the mobile test, you will need to tap the record button when you speak. However, this question bank will help you to prepare and practise for the test and to understand the different question types we use in our Speaking test.

In the real test you can watch the videos twice. We recommend you also try to listen only twice when using these practice questions. We also recommend you record your answers so you can listen to them and improve as you answer the questions.

For more information about the test-taking experience and other useful information, please see the EnglishScore Speaking Test Guide. You can also visit our website at **www.englishscore.com**.
